Right	Right Arrow	D-Pad Right	
Select(in menu)	Space Bar	A/Green Button	.
Main Menu(from game)	Esc	Back Button	.
Use Bomb(in game)	Space Bar	A/Green Button	.

The Goal

As the FORTUNE HUNTER, your goal is to acquire as many DIAMONDS from the maze as you can. Beware, though, because the labyrinth is filled with ZOMBIES, who will strike at you as you move near them. To attack a ZOMBIE, simply move into them. The DIAMONDS are behind locked DOORS that you will need KEYS to open. To open a LOCK, simply move into it. Finally, to exit the dungeon, you will need an EXIT KEY which will allow you to leave via the EXIT. There are a lot of ZOMBIES, but despair not! There are numerous POTIONS and SHIELDS to help you, as well as ATTACK, ARMOR, and HEALTH UPGRADES. Best of luck, FORTUNE HUNTER!

Hints and Tips

- 1). Items in this game are immediately used upon collecting them, which means that when you pick up a POTION, you immediately drink it, and when you pick up a SHIELD, your ARMOR instantly goes up. Since a POTION gives you a particular amount of HEALTH back, and because your ARMOR statistic has a maximum based on your current upgrade level, you may not always receive the full benefit of the POTION or SHIELD.
- 2). After each move you make, you will be struck by every ZOMBIE that was adjacent to you that lives after your move is complete. Attempt to face ZOMBIES one at a time to minimize ARMOR and HEALTH loss.
- 3). You start with a particular number of BOMBS based on your difficulty level. A BOMB will damage all enemies next to you. Use them sparingly!
